Nicholas Chen

Boston, MA | chen.nich@northeastern.edu | 6505440553 | linkedin.com/in/nckchen | nckchen.dev

EDUCATION

Northeastern University | Khoury College of Computer Science | Dean's List **May 2027**
Candidate for Bachelors of Science in Cybersecurity | Minor in Law and Public Policy *Boston, MA*
Certifications: **ISC2 Certified in Cybersecurity, CodePath Intermediate Cybersecurity** **GPA: 3.72**

EXPERIENCE

Security Risk Engineer Co-op **July 2026 – Present**
Klaviyo *Boston, MA*
- Built ETL pipeline syncing **300+** risks and control weaknesses from internal risk database to Snowflake
- Designed **bidirectional** architecture linking siloed Risk and GRC systems, tracking audit findings into remediations
- Led security reviews of **10+** third party integrations into main application, built AI assistants to **halve** workload
- Authored Standard, Procedure, and Policy documentation templates, adopted across **all** of Trust and Compliance

Software Engineer → Technical Lead **May 2025 – Present**
Code4Community *Boston, MA*
- Designed and built repo-wide Cognito module elimininating per-project authz/authn setup for **6+** future projects
- Built **10+** NestJS/Postgres endpoints, implemented into **2** React pages from Figma for user/applicant management
- Refactored backend via **4** SQL migrations on **6+** models with Jest/Postman tests to meet evolving client changes
- Led TypeScript/React workshop for **50+** underclassmen; built backend for **9-week** course shipping full-stack apps

President **Sep 2024 – Present**
FirstByte *Boston, MA*
- Lead **5** teams, **10** club leads, **4** Boston youth org partners to bring CS/STEM accessibility to **100+** K-12 students
- Built, coordinated volunteer groups for **8+ 1-hr** CS workshops. Led **2x** increase in partnerships, **20+** new members
- Led creation of **3-day** full-stack development curriculum, presented live to **70+** students at **university** hackathon

Cybersecurity Research Assistant **Jan 2026 – May 2026**
Cybersecurity and Privacy Institute at Northeastern University | Mon(IOT)r Group *Boston, MA*
- Researched and presented destination analysis on network transmissions from **81+** industry-standard IoT devices
- Used dpkt, cymruwhois, pandas and MaxMind GeoLite in scripts to analyze packet organization and country origin

Cybersecurity and Technology Audit Co-Op **Jul 2025 – Dec 2025**
Liberty Mutual Insurance *Boston, MA*
- Audited **17** cybersecurity policies across **4** SBUs, evaluating MFA, third-party risk management, and SDLC controls
- Identified **3** security control gaps in IAM permissions and CI/CD protocols across **4** sampled enterprise applications
- Authored **7** independent audit report sections and tracked and escalated **2** closed issue remediation validations
- Prompt engineered **4** AI assistants; automated evidence review of **200+** previous audits, **50%** quicker analysis

PROJECTS

AWS Misconfiguration Scanner - CloudSight | *FastAPI, React, Neo4j, Docker, boto3, Terraform* **Apr 2026**
- Dockerized full-stack cloud security scanner detecting misconfigurations across EC2, S3, Lambda, and IAM
- Implemented 8+ checks for different AWS risks: IMDSv1 exposure, public S3 access, hardcoded Lambda secrets
- Used Neo4j to visualize findings as interactive attack graph; validated against isolated CloudGoat AWS test scenarios

Shared Commute Connector - flock | *FastAPI, React Native, MongoDB, Auth0* **Feb 2026**
- Won *Best Use of Auth0*: Led design/implementation of end-to-end authentication for mobile app hackathon project
- Configured Auth0 SDK in React Native, enforced JWT validation on FastAPI endpoints, integrated Google OAuth
- Deployed API on Railway, used Auth0 Management API to allow full account deletion cascading across MongoDB

Digital Road Trip Planner - throwapin.com | *TypeScript, React, Tailwind, Three.js, Supabase* **Feb 2025**
- NextJS, React, Tailwind, and Three.js frontend, used geospatial data with Leaflet.js, GeoJSON, OpenStreetMaps
- Integrated Google Places API, Directions API, and OAuth to build user-authenticated POI itineraries via Supabase
- Received Honorable Mention for Best Overall Project at 36-hour Hackathon against 100+ contestants, won a mug

SKILLS

Languages: Java, JavaScript, TypeScript, C, Python, Terraform, SQL, Bash
Cybersecurity Tools: Linux, BurpSuite, MetaSploit, IDA Pro, WireShark, NMap, Splunk, Snort, PowerBI
Developer Tools: React, React Native, NodeJS, AWS, PostgreSQL, MongoDB
Extracurricular: The Ortelian Society (**Vice President**), NEU CTF Club (**Top 3** @ SeaTF, **8th** @ BigCTF), HackBeanPot (**MLH Best Use of Auth0, Honorable Mention**), Big Brother Big Sisters (**Mentor**)
Interests: Teaching, Philosophy, Investing, Fishing, Fingerstyle Guitar, Thrifting, Snowboarding, The 1975
